

It's been two years after our last presentation of the popular BAS WebServices in MAMPF. Quite a lot of things happened in this time - and we (1) hope to dazzle you with new demos ---and possible with numbers as well.

Key words: new front end design, new server, new languages, new phonemes, voice activity detection, speaker diarization, formant analysis, Frankenstein's Channel Segregator.

(1) : the BAS developer team: David, Markus, Thomas, Klaus, Flo, Fritz (alphabetic order)
